ABOUT ME

Passionate Computer Science undergraduate (CGPA: 8.4) with hands-on experience in full-stack development, backend engineering, REST API design, and agile software delivery. Actively seeking **onsite internship opportunities** to apply technical skills in real-world environments, collaborate within professional teams, and contribute to production-grade systems.

EDUCATION

B.Tech in Computer Science Engineering 2023 – 2027 (Expected)

Bharati Vidyapeeth College of Engineering, Pune | CGPA: 8.4/10

TECHNICAL SKILLS

Languages: Java (Spring Boot), Python, JavaScript, C **Web:** React.js, Node.js, Angular.js, HTML, CSS, REST API

Databases: PostgreSQL, MySQL, MongoDB **Tools:** Git, Docker, FastAPI, Flask, VS Code

Core Concepts: OOP, DBMS, Microservices, Operating Systems, Computer Networks, Agile **Learning:** DSA, ML

Soft Skills: Problem Solving, Team Collaboration, Communication, Adaptability, Time Management

PROJECTS

Nova Pay – Enterprise ERP & Business Process Automation | nova-pay-alpha.vercel.app *React | Spring Boot |*

FastAPI | PostgreSQL | Docker

- Engineered a full-stack ERP platform consolidating finance, HR, procurement, and inventory modules in React, backed by Java Spring Boot with JWT auth, RBAC, and ACID-compliant ledger operations.
- Architected a Python FastAPI microservice for intelligent process automation, achieving 0.89 conformance precision on 1,200 event log traces and 93% intent classification accuracy via spaCy NER across 6 enterprise categories.
- Optimised RESTful API communication delivering 38 ms median response under 250 concurrent users; containerised with Docker Compose, reducing peak latency by 51% via horizontal scaling.
- Focused on user-centric UI/UX design, improving usability and navigation across banking and trading features

AI-Powered Water Quality Detector | *Python | Scikit-learn | Flask | REST API*

- Developed an end-to-end ML pipeline classifying water safety from pH, turbidity, and TDS sensor data — covering preprocessing, feature engineering, model selection, and deployment.
- Automated classifier evaluation across Logistic Regression, Decision Tree, and Random Forest by F1 score; deployed via Flask REST API integrated with a real-time monitoring dashboard.
- Implemented backend database storage for historical trend logging, enabling data-driven water safety decisions and pattern analysis over time.

Java Multi-User Chat Application | *Java | TCP Sockets | Multithreading*

- Architected a multithreaded client-server system using Java TCP sockets, enabling concurrent multi-user sessions with real-time broadcasting and stable performance under load — demonstrating core computer network fundamentals.
- Implemented thread-safe message queuing and session lifecycle management, ensuring zero data loss and graceful handling of client disconnections.
- Built a **file transfer module using Java I/O streams**, allowing seamless sharing of logs, screenshots, and documents for faster issue resolution.

INTERNSHIP EXPERIENCE

Deloitte Virtual Internship – Data Analytics Job Simulation 2024

- Analysed structured business datasets and automated workflows to surface actionable insights; delivered stakeholder reports modelled on enterprise-grade analytical and agile delivery standards.

CERTIFICATIONS & ACHIEVEMENTS

- Google AI Essentials Certificate** – Verified via Coursera | **Java Programming Course** – Core & Advanced Java
- Maintaining **8.4 CGPA** while delivering full-stack, ML, and enterprise projects; advancing depth in backend systems and REST API design.
