Introduction

Motivated Computer Science student with strong skills in Java, Web Development, and Machine Learning. Experienced in building real-world projects including AI-powered financial platforms. Passionate about solving problems and seeking an internship to apply technical skills in a practical environment.

Education

B.Tech in Computer Science Engineering

2023 – 2027

Bharati Vidyapeeth College of Engineering Pune , India

CGPA: 8.5

12th Macro Vision Academy , MP Percentage : 81.2

Skills

- **Languages:** Adv Java, C, Python Libraries
- **Web:** HTML, CSS, JavaScript , React js , Node js , Angular js
- **Database:** MySQL, MongoDB
- **Concepts:** DSA, OOPs, DBMS, Machine Learning

Projects

Bishop – AI-Powered Neo Banking & Trading Platform

- Designed and developed a full-stack neo banking system integrating banking and stock trading.
- Built Machine Learning models for fraud detection and stock prediction.
- Integrated NLP chatbot for financial queries like balance, portfolio, and stock suggestions.
- **Tech Stack:** Python (Flask), PostgreSQL, Machine Learning, NLP

AI Powered Water Quality Detector

- Built an AI-powered water quality detection system using machine learning to classify water safety based on key parameters (pH, turbidity, TDS).
- Collected and preprocessed environmental data, applying normalization and feature engineering to improve model performance
- Trained and evaluated models such as Logistic Regression / Decision Tree / Random Forest for classification tasks
- Achieved accuracy in predicting water quality
- Developed a real-time monitoring interface for users to input sensor data and receive instant analysis
- Integrated backend logic with database storage for historical data tracking and analysis
- Improved decision-making for water safety using data-driven insights

Java Chat Application

- Built a client-server chat system using Java sockets.
- Enabled real-time communication between multiple users.

Internship Experience

Deloitte Virtual Internship

- Completed real-world business problem-solving tasks.
- Gained experience in data analysis and workflows.
- Data Analytics Job Simulation

Certifications

- Google AI Certificate
- Java Programming Course

Achievements

- Currently Mastering Machine Learning concepts and applications.
- Actively Solving DSA Problems along with Adv Java.
